

KAMEHAMEHA SCHOOLS®
PRESCHOOL SPECIAL CARE PLAN

A Special Care Plan is needed if your child is under the care of a healthcare provider for a severe drug, food, or environmental allergy; medical condition requiring any activity or other restriction; or developmental progress or behavioral/social emotional concern requiring any special needs accommodation.

Please submit a separate Special Care Plan form for each type of condition. If at any time during the school year your child develops a change, please submit a new or updated Special Care Plan to the preschool.

Kamehameha Schools Preschools staff will not administer any medication with the exception of an epinephrine auto-injector, e.g. EpiPen; students with a known severe allergy should provide an epinephrine auto-injector to be kept at school.
